

SUMMARY

The University of Manitoba has thrived for over 137 years as a place where students come to learn and be inspired. They offer more than 100 programs and most of their academic departments have graduate studies leading to master's or doctoral degrees. Like all institutions of its size, The University of Manitoba has a dynamic Sustainability Program which addresses key issues in areas such as: Energy & Water, Land Management, Waste Prevention, Transportation and more. A detailed list and information on these and other initiatives can be found here:

<http://umanitoba.ca/campus/sustainability/index.html>

To continue the success of their already comprehensive Recycling Program, the University is currently transitioning their campus receptacles by using a select combination of Busch Systems products: Waste Watchers™, Hanging Waste Baskets & 65 Gallon Carts.

QUICK FACTS

Waste Watchers, Hanging Waste Baskets + 65 Gallon Carts

Multi-Stream Recycling

Fort Garry Campus, Winnipeg, MB

Private Public

University

Student & Staff Population: 8,716 (in 2013)

100

DOUBLE WASTE WATCHER STATIONS IN PLACE BY **JULY 2015** (LIBRARIES, LOUNGES, FOODAREAS)

4,000

HANGING WASTE BASKETS IN OFFICES WITH RECYCLE BINS AT DESK-SIDE BY **SEPTEMBER 2015**

600

TOTE/CART STATIONS (GARBAGE AND RECYCLING SIDE BY SIDE) IN PLACE BY **OCTOBER 2015** (HALLWAYS)

NO TRASH STANDS ALONE

Once transition is complete, no garbage can will stand alone on campus. All will be paired with a mixed recycling bin. The program also will:

- Give a consistent look in every building and floor
- Be a system that is easy for users to understand
- Mimic the City's Residential Program
- Collect more recycling & keep out of landfill

COMPARE: CAMPUS-WIDE DIVERSION #'S

For All Recycling (Paper, Cardboard, Beverage Containers & Glass)

September 2014 – 27.35MT

September 2015 – 41.47MT

An Increase Of 52%!
