MATERIAL & CONSTRUCTION DETAILS

Not all recycling, waste or PPE receptacles are created equal. Our company policy is never to compromise on our workmanship or the quality material standards we've set. We only recommend and use quality first grade materials on our containers, and source these from OEM's at highly-competitive prices. Being a manufacturer that buys at high-quantities gives significant buying power with companies which in turn saves you money.

The design process, materials used, finishes and manufacturing standards all affect the final product. Every decision is vital to getting the most value for your investment. You deserve recycling, waste and PPE containers that meet your demands for quality and durability and will enhance your working environment for years to come.

Component	Material(s)	Construction
Body	LDPE	<ul style="list-style-type: none"> Bodies are molded from durable LDPE

ENVIRONMENTAL CONSIDERATIONS

- All Sentry Receptacles use a low energy, resource efficient manufacturing and curing process
- All Sentry receptacle components disassemble at end of life and are fully recyclable
- Low maintenance and extremely long service life
- Manufactured in North America

Busch Systems® is dedicated to environmental responsibility. We maintain an Environmental Management System and are continually working to improve our impact through efficiency, material selection, vendor education, employee involvement, and an unwavering commitment to being a B-Corporation®. If you would like additional information on our product development process or if you don't see the information you need for your project on this page, please contact our Sustainability Team at sustainability@buschsystems.com.

LEAD TIME

Our standard lead times on the Sentry Series are 4-6 weeks. Larger orders may require 6-8 weeks to complete. Please contact us to discuss your specific timing requirements.

PRICING AND ORDERING

Please contact us at **800.565.9931** or sales@buschsystems.com. At Busch Systems®, we design, manufacture and sell our products directly to you. Our sales team is available to assist you with questions about our products, requests for quotes, and orders. Vertical Managers are located across North America to assist with the front-end specification and quoting process, and our in-house Project Sales Coordinators follow your project through from the time you place an order to shipment.

TO ORDER PLEASE SPECIFY

Quantity and component colors. Talk to your dedicated Busch Systems® sales representative for more information. If you do not have a dedicated Sales Representative please contact us via our website at buschsystems.com/contact-us/

INSTALLATION

Busch Systems® Sentry Series containers are hassle-free when it comes to installation. Each container comes fully-assembled and individually boxed using high-density cardboard with high-recycled content to ensure safe and environmentally friendly transport.

To install your Sentry Series containers:

1. Remove unit from pallet and place in desired location
2. (If applicable) Anchor bin to ground through pilot holes at the bottom of the unit.

CARE & MAINTENANCE

Advantages of Busch Systems® LDPE receptacles include:

- Great low temperature impact resistance and excellent chemical resistance
- Great high temperature impact resistance
- Lower stiffness rating which reduces the potential for stress cracking
- High strength-to-density ratio

Their appearance and lifespan will be greatly affected by their care. The frequency of cleaning required depends on the environment in which the containers are used. Outdoor containers will be subject to different environmental conditions than indoor units, i.e. sun, rain, wind, pollution, winter temperatures, and salt/sea air.

To avoid the accumulation of dirt and grime on your Busch Systems® products, and help prevent corrosion, we recommend that a mild detergent be used (not an abrasive), such as a pH-neutral liquid (hand dishwashing or hand car washing soaps, for example) diluted in warm water. Rinse well with clean water. Any dirt adhering to the powder coating should be removed. In order to remove deposits such as salt or dust, use a soft brush (non-abrasive). If this is not sufficient to remove stubborn soiling, the following products have been tested for use:

- Ajax Cream
- Liquid Gumption
- Flash (in water)
- Ajax Liquid (in water)
- Cutting compound ('T. Cut')

Note: Always test soaps/cleaners on a hidden and/or small area beforehand

If solvents are absolutely needed to remove marks, a soft cloth dampened with white spirit may be used.

GENERAL CARE

- Clean with a power washer or light scrub brush (outdoor/municipal bins)
- Clean with a mild detergent and damp sponge or cloth (indoor bins)
- For soil and stain remover, cleaners like Fantastik, Armor All or Acetone can be tried
- UV safe cleaners **MUST** be used on all outdoor bins

THINGS TO AVOID

- Cleaners with chloride or bleach
- Strong Solvents
- Abrasive detergents
- Steel wool or Scouring pads
